HiDOX, THE SMART INTERNATIONAL ERP DOCUMENT COMPANY

The branding and image of an organization are not restricted to communication tools such as brochures and advertisements. ERP documents can also make a contribution. But how do you combine your factual information with graphic design? HiDOX came up with the solution. Since 2004 the company has developed the FormDesigner tool in-house, with which ERP documents can quickly and easily be provided with their own look and feel. This can optimally utilize communication power as well as creating a consistent appearance for your organization.

FAST AND EFFICIENT

The speed with which the form adaptation of documents can be done and the efficient mutual communication that is possible with all the usual office software and hardware, make HiDOX not only an impact-increasing, but also a cost-saving supplier. You not only achieve optimization qua design, but also qua digitization.

THE POWER OF SHORT COMMUNICATION LINES

Since its creation, HiDOX FormDesigner has really taken off. Internet and a worldwide re-seller network guarantee optimal service and support for all (international) customers. By using web conference tools, HiDOX is able to quickly recognize customer requirements and convert them to generally usable functionalities. Working like this, HiDOX has developed the FormDesigner product to an advanced, 100% integrated document-design & distribution tool. But development never stands still. Because of the power of short communications lines, new functionalities are continually being added, and any queries you might have are answered within 24 hours. We do everything we can to offer you optimal service.

100% INTEGRATION

With FormDesigner, HiDOX has succeeded in being able to offer a highly flexible and user-friendly solution; the only one that guarantees 100% integration with ERP. In addition to which, your productivity is increased and you save on unnecessary operations. No more double work with exporting, attaching or graphical designing of files/documents, or with their multi-channel distribution.

DEVELOPED FOR YOUR CONVENIENCE

HiDOX's organizational structure is flat. Consequently, the robust and technically advanced FormDesigner solution stands out because of its low acquisition and maintenance costs. Because HiDOX listens to its customers' requirements, extremely fast installation and implementation are guaranteed. You not only recover your investment exceptionally quickly with FormDesigner, you also save a lot of time, and therefore costs, after implementation. And you can also add to this the returns from the high interest of all your ERP documents.

INTERNATIONALLY PROVEN

FormDesigner is used with complete satisfaction by a large number of internationally-operating companies both within and outside Europe, and it is now being regarded by them as the standard for high-end ERP documents.

INTERESTED?

For advice and support you can directly contact a product specialist within HiDOX's extensive re-seller network, which you can find at www.hidox.com, where you can also find more information about us and FormDesigner. We are happy to show you online what the possibilities are.

The image shows a comparison between two versions of an invoice document. On the left, labeled 'BEFORE', is a plain, text-based invoice. On the right, labeled 'AFTER', is a highly stylized and branded invoice. The 'AFTER' version features a color logo, a postnet barcode, and various graphical elements. Numerous callouts with arrows point to specific features of the 'AFTER' version, including: Color Logos, Tekstbox, Customer dependent languages, Page 1 of X, All kind of barcodes, Electronic stationary and watermark, Dynamic signature, Unicode/UTF 8 Characters, Personalized marketing messages, Business Intelligence information, Different branch addresses as required, Productimages, Different fonts and colors, and Postnet.
