GREAT LOOKING ERP DOCUMENTS

RESTRICTIONS OF ERP SYSTEMS

Every company devotes a lot of time and attention to creating its corporate image, and rightly so. One of the most important aspects of this is the house style, and particularly ensuring that it is consistent throughout all their documents. But formatting ERP documents has restrictions, especially in respect of fonts and layouts. Isn't there another way?

GOOD LOOKING ERP DOCUMENTS IN A TRICE

Based on years of international knowledge of and experience with ERP systems, HiDOX has developed the intelligent high-tech FormDesigner solution for this purpose. FormDesigner has user-friendly and dynamic tools, with which you are able to give your documents the correct form and appearance in one operation. This applies to all your documents: forms, quotations, orders, invoices, price-lists, reports, etc.

SIMPLE CONVERSION TO MICROSOFT

HiDOX FormDesigner goes further than other systems. This advanced solution not only enables you to create PDF or HTML/XML documents, but also to convert your ERP documents from XML to the various Microsoft applications.

FORMDESIGNER'S MOST IMPORTANT FEATURES:

- Simple conversion of ERP documents to Microsoft programmes Word, Excel and Outlook.
- Total integration in all Baan/Infor versions, irrespective of service packs and/or upgrades.
- Microsoft SharePoint provides (controlled) worldwide access to all ERP documents and facilitates easy online collaboration and sharing of ERP documents.

Print data format from native application

Print with HiDOX FormDesigner

BEFORE

AFTER

- Color Logos
- Tekstbox
- Postnet
- Customer dependent languages
- Page 1 of X
- All kind of barcodes
- Electronic stationary and watermark
- Dynamic signature
- Unicode/UTF 8 Characters
- Personalized marketing messages
- Business Intelligence information
- Different branch addresses as required
- Productimages
- Different fonts and colors

SPECIFIC FORMDESIGNER OPTIONS

WORD

- Fields can be blocked to requirement (no longer alterable).
- Independence in respect of the various Microsoft Office versions (2000, 2003, 2008, etc.) thanks to RTF format.

EXCEL

- Fonts, colors and background colours of the original report are automatically carried over.
- Intelligent recognition of field types, such as dates, numbers and texts.
- Simple and unambiguous linking of report fields to columns.

SHAREPOINT

- Metadata (column headers) come directly and dynamically from ERP. Columns are automatically filled in per document, with, for example, invoice date, customer number and postcode.
- Microsoft Outlook mail can be uploaded as a message file to Microsoft SharePoint.

OUTLOOK & LOTUS NOTES

- Automatic link and print of user's signature.
- Thanks to the unicode basis, text, Chinese for example, is carried over in the body text in UTF8 format.
- Among other things, dynamic body texts ensure that the name of the contact person is directly transferred from ERP.
- Mapi mail client: Outlook, Lotus Notes, etc.
- Unique possibility to make mail bundles (merge documents in one e-mail)

HOW DOES FORMDESIGNER WORK IN PRACTICE?

DESIGN

DRAG & DROP

How? By linking report elements to style sheets you alter the font and/or color of your document quickly and easily. Has your font not been defined as standard? No problem for FormDesigner. You very simply make a new style sheet and place your images, photos, illustrations, barcodes, etc. wherever you want. It is just a question of drag & drop and your lay-out is ready!

DIRECT RESULTS

Your adjustments are immediately visible, so you can continue to improve the document until you are happy with it. When it

is exactly as you want it, you activate it by a mouse click and everyone in the organization can immediately work with it. Because FormDesigner is 100% integrated in the ERP system, nothing in the co-workers' daily routine changes.

THE ONLY ONE WITH 100% INTEGRATION WITH ERP

The special thing about FormDesigner is the unique, total integration in your ERP system. You continue working within the trusted structure of your system while you graphically convert all your original ERP documents to the desired house style in one go.

ONE-FOR-ONE

All the data in your ERP system are used one-for-one. This avoids mistakes in numbers, prices and such like. In other words, you re-use your existing, already adapted ERP Reports. This saves you a great deal of time and programming costs.

DYNAMIC INTERFACE TO EXTERNAL DATABASES, SHAREPOINT AND FILING SYSTEMS

FormDesigner offers countless possibilities for linking to other external document-management systems, fax solutions and information servers.

EXTERNAL DOCUMENT-MANAGEMENT SYSTEMS

Because FormDesigner is XML based, it can easily be linked to other external document-management systems, including SharePoint, Easyarchiv (dynamic index fields, search possibilities on complete text), Profile, Retarus, Habel, D3, Saperion etc.

FAX SOLUTIONS

FormDesigner is suitable for the set-up and management of various fax solutions, like Twinfax, Ferrari Fax en Tobit, and has MRS, GFI and various other links for sending faxes.

EFFICIENCY IMPROVEMENT AND OPTIMAL EASE OF USE

INFORMATION SERVER

FormDesign naturally offers a self-configurable interface for every conceivable data source. This makes it possible to read in CAD drawings, for example, or collect data from another ERP system, an Access database or such like.

OPTIMAL EFFICIENCY WITH MULTI-CHANNEL DISTRIBUTION

Once the set-up is complete and the document is in use, one press of the button can send it to all destinations. This is dependent on receiver demands; you choose your destinations. A document is dynamically converted to a Word, Excel, PDF or HTML/XML file and can then be sent directly to several printers, e-mail and/or fax addresses.

CUSTOMER-SPECIFIC DISTRIBUTION WITH ONE PRESS OF A BUTTON

Multi-channel printing makes it possible to print, file, publish, fax and mail documents at the same time. For example: your customer prefers to receive his invoice mailed as a PDF file to his Purchase Department. He would also like to receive a fax from you.

Your account manager prefers the invoice data to be delivered in Excel, in which only the item numbers and totals are specified. With FormDesigner you are able to honour all these customer-specific demands with one press of a button. If you wish, you can easily add variable data and graphic components. It is not inconceivable, for example, that in addition to the standard Excel report, your account manager would appreciate a daily graphic account of his customers' purchases.

PERSONALIZED DOCUMENTS

Clear, more easily readable documents tailored to the specific demands of the customer and the internal user (i.e. Sales or Management) add value to the organization. Diagrams, graphs and barcodes can be automatically added in order to further strengthen the presentation of the content. The advantage of this is that you obtain command of personalized documents in every required language.

AND MORE ...

AUTOMATIC FILING

A special feature of the XML-based FormDesigner is that files are automatically filed away on the basis of an index file.

QUICKLY USABLE FOR CROSS-SELLING AND UP-SELLING

Personalized communication increases the impact of documents by 30 to 40%. With FormDesigner previously non-utilized white space on a document can quickly and easily be used for cross and up-selling. This is because FormDesigner offers, among other things, the opportunity to alert your customers, via your invoice or by placing an URL, to an up-coming show or exhibition, a temporary activity or campaign, etc.

ECONOMIC AND SUSTAINABLE: COST AND ENVIRONMENTALLY-AWARE DOCUMENT USE

You choose both an economical and an environmentally-aware solution because FormDesigner:

- Eases the move from paper to electronic ERP documents and the re-use of your existing ERP documents.
- Ensures a better reception by means of personalized, customer-specific documents.
- Generates few customer questions, a reduction in mistakes and reminders.
- Increases your service level with extra added value.
- Reduces your paper and postal costs (double-sided printing, pre-printed forms no longer necessary).
- Streamlines your document process and increases the efficiency per document.
- Reduces your IT costs through very efficient storage of your documents.
- FormDesigner functions excellently in a virtualized Windows Server environment (VMware).

FORMDESIGNER IN SHORT

CHOOSE THE QUALITY, STABILITY AND FLEXIBILITY OF FORMDESIGNER:

- The only application developed from the same logic and structure as ERP software.
- No double work.
- Unique 100% integration with ERP, irrespective of ERP versions, upgrades and service packs, ensuring no unnecessary programming.
- Available in all languages and all languages are supported.
- Fast: a completely laid-out usable document in just one day.
- Substantial savings on paper and postal costs through further digitalization of processes.
- Time-saving through Multi-channel application: simultaneous printing, faxing, e-mailing, sharing and filing.
- Physical space-saving through digital filing.
- Minimal training and programming costs for the IT department (only 1 to 2 hours).
- Low acquisition and maintenance costs.
- Surprisingly simple in regard to implementation and use: installed within an hour. No expensive consultants in the company for weeks on end.
- Fast real-time support/service throughout Europe by product specialists with practical knowledge.

WHY FORMDESIGNER?

FormDesigner is the only solution that fulfils what's promised of it in respect of low costs with a very high return.

WHAT ARE THE ADVANTAGES FOR USERS AND YOUR IT DEPARTMENT?

- 2x as fast document processing
- Electronic document formats; reduction in print and postal costs
- Decrease in mistakes through electronic processing
- Fewer complaints through well-organised lay-out appropriate to house style
- Short learning curve, intuitive operation, no extra expertise required
- Very fast installation time \leftarrow1 hour
- No training needed for end-user

OPERATIONAL WITHIN ONE DAY AND WITHOUT THE NEED FOR EXTERNAL EXPERTISE

Installing FormDesigner is extremely easy. The installation only takes an hour, after which an hour's training is sufficient for

setting out forms. After the training you can independently lay-out and send ERP documents and use and make them available to the departments that will use them. You therefore need neither days of training nor expensive consultants in order to ensure that everything works as it should and to get the hang of FormDesigner. In this way your investment is quickly recovered.

24-HOUR SERVICE

As creator, designer and producer of smart software tools, HiDOX supports customers with a compact and specialized European re-seller network. You have direct contact with a re-seller who is familiar with your organization and who of course has specialized knowledge of HiDOX products. These re-sellers regularly follow training courses and are always up-to-date on the latest developments and applications. Because of this you are assured of intensive personal guidance and (online) support.

GRAPHIC OPTIONS

You put your documents together exactly as you want them to be with the desired Microsoft Windows fonts, background colours, logos, pictures, photos and type of barcodes.

PROCESSING POSSIBILITIES

From FormDesigner you can easily generate e-mail and fax, PDF, Word and Excel documents and HTML/XML documents.

UNPRECEDENTED FLEXIBILITY

- Information server: interface to extern information sources (self-configurable).
- Interface to countless document-management systems, including SharePoint.
- Interface to various fax solutions.
- Automatic filing on the basis of index file.
- Fast and easy document (re)viewing.
- Unlimited adjustments.
- Add unlimited number of attachments, even from other databases.
- Add unlimited information, including headers, footers, campaigns/promotions) announcements, general terms & conditions, etc.
- Double-sided printing.
- XML-based.
- Personalized documents: customer-specific application for cross and up-selling.
